

HUGO CUNHA

CYBER SECURITY ANALYST | INFORMATION SECURITY | GRC ANALYST | SOC ANALYST

✉ eng.hugocunha@gmail.com ☎ +351 (0) 915 206 765 💎 Porto, Portugal

I am an IT professional with over twenty years of experience, recently transitioned into cybersecurity. I hold the **CompTIA Security+ (SY0-701)**, the **ISC2 Certified in Cybersecurity (CC)**, the **Google Cybersecurity Professional Certificate**, and the **Research Data Management & FAIR Principles Certificate**. I am submitting my application for Cyber Security Analyst, Information Systems Security Analyst, GRC Analyst, and SOC Analyst positions.

As a Systems Analyst with more than eight years of consolidated experience managing technology infrastructure across corporate and institutional environments, I am specialised in Linux and Windows systems administration, enterprise network management, IT security, and the integration of collaborative platforms (Google Workspace and Microsoft 365). My profile is defined by strong versatility, proven adaptability, rapid incident response, end-user technical support, and the implementation of solutions oriented towards digital efficiency and the technological modernisation of organisations.

My deep infrastructure background — spanning web server administration, complex network management, systems hardening, disaster recovery, and data integrity protection — provides skills directly transferable to the daily operations of a cybersecurity team. My hands-on training has focused on Blue Team operations through the TryHackMe platform, where I have completed the *SOC Level 1 Learning Path*, including practical modules in **Splunk, Elastic Stack, MITRE ATT&CK, SOC L1 Alert Triage, SOC L1 Alert Reporting, and SOC Simulator**. I am currently preparing for the **Splunk Core Certified User** certification to further strengthen my proficiency with SIEM tools used in production environments.

My **Research Data Management & FAIR Principles** training directly supports information security governance, data classification, and IS policy development — core competencies for GRC and Information Systems Security Analyst roles. Understanding data lifecycle management, metadata standards, and FAIR-aligned governance strengthens my ability to contribute to compliance frameworks (ISO 27001, NIST CSF) and organisational data protection strategies.

TECHNICAL SKILLS

- **Operating Systems:** Linux (Kali, Ubuntu, CentOS), Windows Server, Windows 10/11, macOS
- **Security:** Permissions management, network segmentation, backups, intrusion detection, hardening
- **Data Management:** Advanced Excel, MySQL, Microsoft Access, dashboard creation
- **Frameworks & Standards:** NIST CSF, ISO 27001/27002, MITRE ATT&CK, OWASP Top 10, FAIR Principles
- **Incident Response:** Digital forensics, chain of custody, order of volatility
- **Collaborative Platforms:** Google Workspace, Microsoft 365
- **Networks & Infrastructure:** LAN/WAN, VLANs, VPNs, firewalls, DHCP, DNS, NAT, Cisco routers
- **SOC & Blue Team:** Splunk, Elastic Stack, MITRE ATT&CK, alert triage and reporting
- **Automation & Scripting:** Bash, PowerShell, Python (basic-intermediate)
- **GRC & Data Governance:** Data classification, IS policy, risk assessment, compliance, FAIR data lifecycle
- **Cryptography & PKI:** Certificate management, digital signatures, hashing
- **Assets & Licensing:** Equipment and software inventory and updates

Beyond technical skills, my differentiators include analytical rigour, the ability to communicate both technical and non-technical content in Portuguese, English, and Spanish (fluent), French and German (intermediate), as well as the methodical mindset required by the role. My experience in international environments — including positions at Apple Cambridge, Microsoft Portugal, and Virgin Media — confirms my capacity to operate within multidisciplinary teams and under pressure.

I am highly motivated to join a cybersecurity team where I can contribute my experience, dedication, and continuous willingness to learn, in a sector that evolves constantly. I am entirely available for an interview, where I would be pleased to expand on my application and demonstrate how my profile can add value to your organisation.

Thank you for taking the time to consider my application.

Kind regards,

Hugo Cunha
