PROFESSIONAL SUMMARY

IT and security professional with 20+ years of hands-on experience in webserver security administration, network engineering, and software development. Proven track record securing production servers, managing network infrastructure, and building software at Microsoft Cambridge, Apple Cambridge, and Virgin Media U.K. CompTIA Security+ and ISC2 CC certified, with completed SOC Level 1 training across SIEM, log analysis, phishing triage, and digital forensics. Preparing for ISO 27001 Lead Implementer (Sept 2026). Trilingual. Immediate availability.

CERTIFICATIONS

CompTIA Security+ SY0-701 · Jun 2026 **ISC2 CC** · Apr 2026 **Google Cybersecurity Certificate** · 2026

PECB ISO 27001 Lead Implementer · Expected Sept 2026 **Research Data Management & FAIR Principles** · 2026

CENTRI: Blue Team Junior Analyst · Intro to Penetration Testing · Intro to Vulnerability Management · Intro to Threat Hunting · Intro to Digital Forensics · Intro to Network Analysis · Dark Web Operations · Intro to OSINT

TECHNICAL SKILLS

SIEM & Monitoring: Splunk, ELK Stack, Wazuh, Wireshark, Snort, Suricata

Security: Alert triage, log analysis, phishing analysis, malware analysis, vulnerability assessment, IDS/IPS, endpoint security, WAF

Frameworks & GRC: NIST CSF, ISO 27001/27002, MITRE ATT&CK, Cyber Kill Chain, OWASP Top 10, data governance, FAIR principles

Infrastructure: Linux (Kali, Ubuntu, CentOS), Windows Server, macOS, LAN/WAN, VLANs, VPNs, DHCP, DNS, NAT, Cisco routers, firewalls

Development & Tools: Python, Bash, HTML/CSS/JS, Nmap, Burp Suite, Autopsy, TheHive, VirusTotal, Git, WordPress, web server admin

PROFESSIONAL EXPERIENCE

Webserver System Security Admin — Axtion Games / MicroDual / 100Loops

2003 – Present

- 20+ years securing production web servers: hardening, patch management, access controls, SSL/TLS, DNS, WAF configuration, and backup procedures across Linux and Windows Server environments
- Monitored server logs for anomalies, investigated security incidents, deployed preventive countermeasures; managed user permissions and enforced security policies

Network Engineer — MTM

2019 – 2026

- Designed and maintained LAN/WAN infrastructure including routers, switches, firewalls, and VPN tunnels; managed access controls and network segmentation
- Monitored network performance and security events; diagnosed connectivity issues and implemented corrective measures under SLA

Audio Software Developer for Gaming — Microsoft Cambridge

May 2013 – Sep 2014

- Developed audio software components for gaming platforms within Microsoft's engineering team in Cambridge; structured SDLC, code review, and QA pipelines

Marketing Manager & Helpdesk — Virgin Media U.K.

Apr 2013 – Sep 2017

- First-line technical support and escalation for broadband, network, and TV services; triaged incidents under SLA in high-volume helpdesk; improved resolution workflows

Junior Data Analyst Admin, Software Developer (Dragon App) — Apple Cambridge

Jun 2010 – Jul 2012

- Data analysis and software development within Apple's engineering team; built analytical workflows and contributed to the Dragon App project

Web Developer — Alliance BJJ Porto

2019 – 2026

- Full-stack web development and hosting management; administered web server configs, SSL/TLS, and access controls

Contributor — Reddit Online / Pop Corn Time

2010 – Present

- Open-source contributor: backend development, infrastructure support, and community-driven platform contributions

macOS Beta Tester — Apple (2006–Present) **Web Designer — Dealema Musicians** (1999–2003)

PROJECTS & SOC LAB WORK

TryHackMe SOC Level 1 — 31 rooms, 6 modules: SOC Fundamentals, Alert Triage, Alert Reporting, Splunk, Elastic Stack, MITRE ATT&CK. Writeups at hugocunhacv.github.io

ThePassLab — Interactive website with flashcards designed to help pass CompTIA Security+ and ISC2 CC in 30 days

EDUCATION & PROFESSIONAL DEVELOPMENT

FEUP, University of Porto — Network Operating Systems · Network Protocols & Equipment · IT Technician Level 4 (2006)

Cambridge University Seminars — Network Security & Code Injection · National Infrastructure Cyber Attack · Business of Encryption · Policy-Making Data Revolution · Challenges of Cyber Warfare · Innovation in Open Networks

ADDITIONAL

Languages: Portuguese (native), English (fluent), Spanish (fluent), French & German (intermediate)

Availability: Immediate — Porto on-site, hybrid, or remote EU/UK • **Next**: CySA+, Splunk Core Certified User
